

NEUROFACTOR™

Natural Support for Brain Health

Over 8,300 papers published on BDNF since 2014. pubmed.com

WHAT IS NEUROFACTOR™?

NeuroFactor™ is a natural, patented extract derived from premium *Coffea arabica* coffee cherries. It contains a unique profile of polyphenols that has been shown in clinical studies to stimulate the production of **Brain-Derived Neurotrophic Factor (BDNF)**, a key neuroprotein involved in overall brain health.

For centuries, coffee fruit has been a waste product of the traditional coffee process. FutureCeuticals discovered an **eco-friendly** path that preserves the

whole fruit, and the unique polyphenols within, for the benefit of human health.

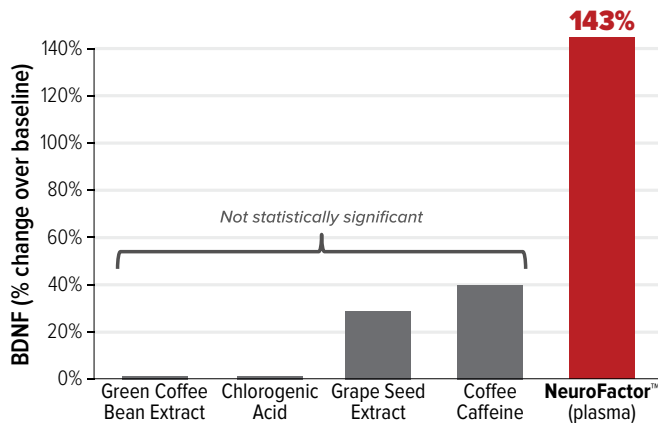

WHAT IS BDNF?

BDNF has been widely reported to play a **critical role** in the development, maintenance and repair of neurons, and protection against neuro-degeneration.

NeuroFactor™ is a natural botanical shown to **significantly increase** BDNF levels in two double blind, peer-reviewed studies of healthy human subjects.

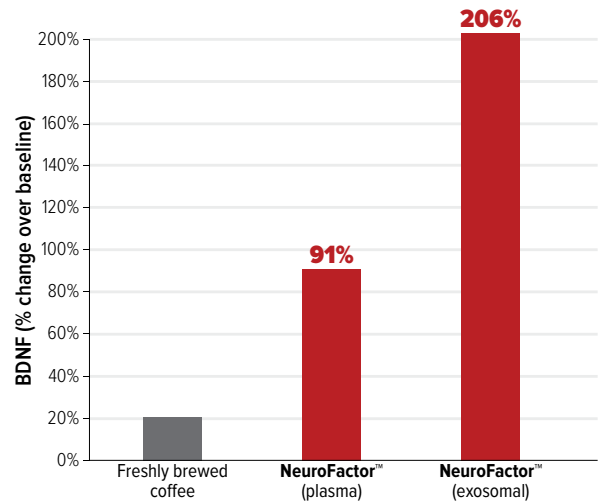

PUBLISHED CLINICAL STUDIES

NEUROFACTOR™ STUDY 1:

100mg of NeuroFactor™ stimulates significant production of BDNF within the human body. **Other coffee, caffeine, and polyphenol compounds do not work**, suggesting the unique polyphenol profile found within coffee fruit is responsible for naturally increasing BDNF.

NEUROFACTOR™ STUDY 2:

Larger subject size (N=20) still shows 100mg of NeuroFactor™ stimulates BDNF. Ingesting brewed coffee also did not show any significant increase. Further results showed BDNF present in exosomes, which have the ability to cross the blood-brain barrier (BBB).
